Internal Revenue Mr. Rollims' ReThe annual report of Mr. Rollims' Rescioner of Internal Revenue, shows that the receipts in 1857 were \$105,820,474. The receipts
of internal revenue for the past three years, er
clusive of the direct tax upon lands, and the
duty upon the circulation and deposits of national banks, were, for the year 1857, \$265,920,474.65.
The following were the receipts from special
rouroes:

CRIPTS PROM BANKS, TRUST COMPANIES AND SAVINGS INSTITUTIONS.
1865. 1865. 1867.

Deposits 2,043,841 2,090,325 208,276
Deposits 2,043,841 2,090,325 268,276
Deposits 2,043,841 2,090,325 1,355,367
The reduction of receipts from capital, circulation and deposits is due to the conversion of State banks into national insultutions, paying taxes into the Treasury of the United States.
Deposits of savings having no capital stock have largely been relieved from taxation by the set of July 13, 1866.

Baltanans.

Sales of beer stamps are not included in the During the year the sum of \$1,927,117 56 was receipts above given.

During the year the sum of \$1,927,117 56 was received from the sale of one cent stamps, and \$3,231,247 27 for stamps from special dies for matches, perfumery, coemeties, medicines, and other proprietary articles.

LEGACIES AND SUCCESSIONS

\$545,807

Total number.

RAW COTTON.

The lax on raw cotton was as follows:

18,409,654
23,769,075
44 August

The tax was two cents per pound until August 1, 1800, when it was increased to three cents, where it remained until September, 1807, when it was reduced to two and a half cents per pound.

1-66 1.2.329.921

The tax upon smoking tobacco, except that unde exclusively from risens, was increased in March, 1869, from 25 cents to 35 cents per plund. Fine cut chewing and plug, in March, 1969, was increased from 35 cents to 40 cents per pund. Fine cut chewing and plug, in March, 1969, was increased from 35 cents to 40 cents per pound, where it still remains. The tax upon smoking tobacco not sweetened, etermined or butted, was reduced in 1965 to 15 cents per pound. II 0.75,955 pounds of the manufactured article were exported in bond during the last facal year, while the amount in bonded warshouse was increased from 4.123.631 pounds on the 1st of July, 1865, to 7,699,001 pounds in the 1st of July, 1865, to 7,699,001 pounds. The product of 1866 was largely pre-udled by tobacco manufactured in the South before the war and during its progress, and after its close brought to Northern markets. Not withstanding the heavy loss by fraud, the increase of the receipts has been quite satisfactory.

Los tax of one dollar per harrel has been continued during the three years.

Distilled Spirits.

Distilled

The amount of spirits forfeited has been largely in excess of that during any year preceding, and probably equals the whole amount prior to June 30, 1966. The receipts from forfeited spirits are not included in the above. The frauds connected with the production and removal of spirits are of vary alarming extent and character, and will be considered more fully in another part of this report. The amount of spirits in bonded warehouse on the lat of July, 1966, 17,987,372 gallons. The amount out of warehouse under transportation bonds on July 1, 1966, was 6,081,501 gallons. The amount out of warehouse under transportation bonds on July 1, 1967, was 3,931,444 gallons. The amount of spirits received into "class 2 warehouses," so called, for the manufacture of medicines, cosmetics, cordisk, &c., for exportation, was 592, 737 gallons. The amount spon which tax was paid was 14,148,132 gallons. From this it will appear that the amount of distilled spirits which was reported to revenue officers during the year 1867, and which can be accounted for, is 22,299,639 gallons. The difference between this amount and the actual production measures the product which reached the market through fraud.

Of the tax on spirits, the Commissioner cays:

"The propriety of imporing a large tax upon distilled spirits has never been seriously questioned in this country. It most cases where tax upon distilled spirits has never been seriously questioned in this country. It most cases where through fraud.

Of the tax on spirits, the Commissioner cays:

"The propriety of imporing a large tax upon distilled spirits has never been seriously questioned in this country. It most cases where through fraud.

Of the tax on spirits, the commissioner cays:

"The propriety of imporing a large tax upon distilled spirits has never been seriously questioned in this country. It most cases where through fraud.

Of the tax on spirits, the Commissioner cays:

"The propriety of imporing a large tax upon distilled spirits of the production of fine cases of the prod

sive and alarming frauds, which undoubtedly exist.

"Under the law and the regulations of the Department all distillers are required to make daily record and tri-monthly report to assessors of all materials used, and the number of gallons distilled and placed in warehouse, and sold from warehouse, with the name and place of business or residence of purchaser. Now, as all must, under the law, be warehoused, it is obvious that if correct report of production is made no fraud eas he committed without the knowledge of responsible revenue officers. Every with drawal of spirits, whether for consumption, transportation, restification, restification, residiantion, residiantical interesting the production is charged to the proper collector, and must be accounted for by him in tax received at withdrawal for consumption or by bonds or other evidences of removal for the several purposes above named and anthorised by statuts. These bonds have occasionally been insufficient, and in some instances it is believed they have been corruptly taken; but they are still in existence, and the amount of spirits corrected by them is easily ascertaioable. It is small in comparison with the quantity which has reached the market through other avenues of fraud. It is pessible, of course, for all evidence of removal from warehouse to be destroyed, but such destruction involves the necessity of such wholesale and monstrous combinations of assessors and collectors and their assistants that I cannot and de not contemplate it as an actual sxistence. The bonded system has probably turnished opportunity for a particular class of frauds, as very additional genuine sent increases the variety, while it may not increase the number of counterfeits. It is permits and brands have been imitated, but bills of lading have now been substituted for permits, so that the duplicate and even triplicate adjuments to other countries, although absolutely large, is really of small magnitude when compared to the full amount which are offered that for the first owner f

gallone.
"I believe most of the illicit spirits in the "I believe most of the illicit spirits in the market is the product of those establishments whose proprietors resport far wareheaving only a protion of their production. A smaller amount is from hidden and unrecognized distilleress were from specific taxes graduated by different values of the cigars. On March 3, 1865, a uniform daty of \$10 per thousand was imposed. By the statute of July 13, 1866, ibservand by the tof March fast the tax of \$5 per thousand was adopted, which was a very large reduction from the then eastering duty.

Chawing and smaller production. A smaller amount is from hidden and unrecognized distilleress, and emptied in mediately into vais, where it can never be statute of July 13, 1866, ibservand was adopted, which was a very large reduction from the then eastering duty.

Chawing and smaller production. A smaller amount is from lider which is included in the section of their production. A smaller amount is from hidden and unrecognized distilleress, and unrecognized distilleress or unsuperstant of the illicit spirits in the market is the product of those setablishments whose proprietors resport far warehousing only a protion of their production. A smaller amount is from hidden and unrecognized distilleress to supplie the supplied in the statute of the illicit spirits in the market is the product of those setablishments whose proprietors resport far warehousing only a protion of their production. A smaller amount is from hidden and unrecognized distilleress. The illicit whisky is conveyed ambranded to neighboring rectifying houses, and emptied in mediately into vais, where it can never be statuted in the section of their production. A smaller amount is from hidden and unrecognized distilleress.

when all are equally guilty and equally liable to a punishment.

"These extensive frands have not only robbed the national treasury, but have driven from their accustomed business many men of acknowledged integrity. Others have taken their places for the special and sole purpose of acquiring fortune through fraud."

Mr. Rollins recommends a revision of the tax law, especially by making capacity of distillation the basis of taxation and by the adoption of spirit meters. He also favore the system of compromises, and recommends such an amendment of the law as will require all persons paying special tax as manufacturers, but no tax upon articless manufactured, to pay an additional monthly tax upon sales, with the same limitation as are now imposed in the case of dealers.

dealers.
The expense of collecting the revenue in 1867 was \$7.712,082.
